Hello Nasim and Brent:

Here is additional information as queried by our DOE-Oversight Bureau. It may be duplicative to what I sent earlier but I wanted to ensure that you had all the data. If you have any questions please let me know.

Thanks,
Sarah

Sarah and Kris- See attached. I pulled the data in three groups.

1. All Urban Study Data (there isn't any after Oct 2017)
2. All surface water samples from the Rio Grande and some key tributaries
3. All stormwater data that is available in Intellus after Oct 2017

I know for certain that not all data from last summer's stormwater season is publicly available. We had to hold some samples due to the end of the fiscal year and some data is still in its 30 day review period.

This is my best guess on what you needed without specific site names. Let me know if I missed something.

SWQB has requested any data related to LANL and vicinity stormwater and Rio Grande surface water data that was uploaded into Intellus after Oct 2017. Can you please pull any data that meets those criteria and email it to Sarah Holcomb and Kris Barrios in SWQB?

SWQB has a particular interest in any data collected below White Rock. Did the urban sample project include any White Rock-area locations. If yes, please provide Sarah with those sample names and any data from them.

Regards,
Susan

Hi Susan,
Yes, if you could have Megan pull that data and send it to me, that would be fantastic. Thank you!

Sarah

Sarah,

DOE-OB collected data stormwater and Rio Grande sampling from Oct 2017 through the present that wasn't in Intellus at the 11/20/17 data pull date.
Most of that data is either IP-related, on Sandia/Mortandad Canyon, or Rio Grande grab samples from the Oct 2017 float trip.
I can ask Megan to pull the data if you have a specific sampling area/region/

Susan

Hi Sarah,
We pulled data from Intellus posted through 11/20/2017 for the 2018 303(d)/305(b) IR. I imagine there is more posted since then. Let me know if you need the IR dataset.

Hi all,

Please see below. Do we have any new data since 2015 that would assist EPA in their analysis of the LA MS4 designation request? I can send Nasim information about the new 303(d) listings on the Plateau, but if there is additional data outside of that, can you please let me know? I can also do another Intellus data pull if you think there is additional data.

Thanks,
Sarah

Dear Sara:

If you have any new Data/information regarding Los Alamos designation please let me know as we are trying to finalize the Preliminary designation..

Thank you,

Nasim..
